JUNIOR QA ENGINEER

Detail-oriented and motivated Junior QA Engineer with hands-on experience in software testing, bug tracking, and quality assurance processes. Skilled in executing test cases, identifying defects, and ensuring product quality across multiple platforms. Proficient in manual testing tools with a strong understanding of SDLC and Agile methodologies. Eager to contribute to a dynamic team and deliver high-quality software solutions

PROFESSIONAL EXPERIENCE

Prime Minister Internship Program

Jan 2024 - June 2024

Network Engineer - Intern

- Assisted in the design, installation, and maintenance of network infrastructure, including LAN/WAN, routers, switches, and firewalls.
- Monitored network performance, troubleshoot connectivity issues, and supported the resolution of network incidents to ensure minimal downtime.

PERSONAL PROJECTS

Developed and executed comprehensive test cases for four diverse projects, ensuring high-quality software performance and functionality by identifying and addressing critical bugs and issues
